SUMMARY

Full Stack & AI Automation Engineer with 8 years of production experience, including 4+ years building and scaling a white-label SaaS platform to enterprise clients across Europe. Specializes in shipping AI-powered systems — Claude API, OpenAI, Vapi — that eliminate manual workflows at scale, with a proven track record of cutting content production time by 87%, scaling outreach to 600+ automated calls/month, and driving production incidents from 9/quarter to zero. Owns entire product surfaces end-to-end, from React/Next.js frontends to GCP infrastructure, in fast-moving remote environments.

TECHNICAL SKILLS

Frontend: React · Next.js · TypeScript · JavaScript · Redux · PWAs · Material-UI
Backend: Node.js · REST APIs · BullMQ · Shopify API · Redis
AI & Automation: Claude API · OpenAI API · Vapi AI · Langbase · n8n · Prompt Engineering
Cloud & DevOps: GCP (Cloud Run · Memorystore · Load Balancer) · SSL/TLS · Git · CI/CD
Design & Tools: Figma · Storybook · Klaviyo

EXPERIENCE

Full Stack & AI Automation Engineer · Decommerce *Mar 2022 – Present*
B2B SaaS platform combining community infrastructure, gamified growth marketing, and CRM automation — enterprise clients include TBO Clothing, Sonova, and Thalia (Europe)

- Owned the entire Next.js frontend end-to-end — architecting and shipping the full UI surface of a production B2B SaaS platform (community feeds, gamification flows, dashboards, admin panels, and page builder) while heavily contributing to Node.js REST API design and implementation across 3 simultaneous enterprise clients.
- Engineered a gamified Growth Engine — points, badges, leaderboards, missions, and referral invite flows — turning passive audiences into active brand communities and reducing enterprise client reliance on paid acquisition channels.
- Engineered a no-code Visual Micro-Apps Automation Engine with real-time event triggers, CRON scheduling, and AI-powered moderation steps (sentiment, toxicity, quality scoring via Claude/OpenAI) — eliminating 14 hours/week of manual review across client teams.
- Launched an AI-Powered Page Builder with 12+ drag-and-resize block types and a two-stage Claude pipeline for structured blog generation, slashing client content production time by 87% — from 3 hours to 23 minutes per post.
- Deployed outbound AI call automation via Vapi + n8n with call evaluation logic and automated email follow-up sequences, scaling client outreach to 600+ calls/month and eliminating 3 full-time hours of daily manual outreach.
- Built client-facing analytics dashboards surfacing real-time engagement metrics, campaign performance, and user behaviour — giving enterprise admins self-serve visibility and eliminating ad-hoc reporting overhead from the engineering team.
- Delivered Klaviyo integration connecting real-time community events to email lifecycle campaigns, enabling behaviour-triggered retention automation without additional engineering headcount.
- Built a white-label theming system enabling each enterprise client to independently deploy a fully branded community experience, cutting per-client onboarding time by 4 days (~$3K/client in engineering cost).
- Re-architected Redis on Google Cloud Memorystore and redeployed on GCP Cloud Run + Load Balancer, reducing production incidents from 9/quarter to zero and sustaining 99.8% uptime across 18+ consecutive months.

React Developer · ComOn Enterprise LLC *Jun 2021 – Mar 2022*

- Delivered 4 production Next.js applications with SSR and PWA capabilities, achieving sub-2s mobile load times across all deployments.
- Built a Storybook component library of 35+ reusable components adopted across 3 active projects, reducing UI development time by an estimated 38%.

Full Stack Engineer & Team Lead · Smart Reality *Dec 2018 – Mar 2020*

- Led a 5-engineer team to ship an AR educational mobile app (React Native + Unity 3D) from zero to launch in 11 months, reaching 1,000+ downloads with a 4.2-star average rating.
- Architected the React Native shell embedding Unity 3D AR containers, resolving native-to-JS bridge performance bottlenecks to deliver a smooth AR experience on mid-range Android devices.

Frontend Developer · AcroEx *Jun 2016 – Dec 2018*

- ▸ Shipped 11 commercial HTML/CSS/WordPress templates on ThemeForest, each generating 100–1,000+ sales — establishing a foundation in responsive, cross-browser frontend development at scale.

EDUCATION

ACCP Prime — Aptech Certified Computer Professional *2015 – 2018*
Aptech Pakistan · Computer Science
